Enhance 3.1

Create Engaging **Flash**
eLearning
using MS word

Key Features

▶▶ Rapid Development

RapideL Enhance^{3.1} provides an intuitive and user friendly interface for the Subject Matter Expert to automate the process of creating an eLearning course. Integrated with a redesigned interactive and non interactive template repository, RapideL Enhance^{3.1} generates full-fledged ready to deploy eLearning.

▶▶ Rich templates

The rich template library of RapideL Enhance^{3.1} contains ready-to-use, instructionally sound templates which enables virtually anyone to create engaging eLearning. These templates are well categorized according to their Instructional need and are built to meet learning objectives at the knowledge level.

▶▶ Powerful Review mode

Courses created using RapideL Enhance^{3.1} can be previewed and reviewed by SME's/ID's in real time, and the reported issues can be assigned to respective developers to update content. There is no need to maintain a separate process for quality assurance. This feature cuts down iteration cycles by 70%.

▶▶ Robust Reporting Framework

The robust reporting function of RapideL Enhance^{3.1} facilitates creation of the much needed media asset reports. At the click of a button, users can now create reports for graphics and audio scripts from the storyboard interface. This helps the stake holders to visualize, comprehend and manage the project more efficiently.

▶▶ SCORM Compliant Output

Publish and package RapideL Enhance^{3.1} courses into fully SCORM compliant courses ready to be launched on any LMS that conforms to this standard. RapideL Enhance^{3.1} supports SCORM 1.2 and SCORM 2004 versions. The author can choose to publish courses at Course level and/or Module level SCO. All this is just a click away!

▶▶ Collaboration

RapideL Enhance^{3.1} allows Subject Matter Experts, Instructional Designers and Graphic Designers to work in a collaborative environment over a network. Courses created using RapideL Enhance^{3.1} can be shared at a global or a module level. This feature also allows sharing of course assets across the network.

▶▶ Support for Localization

The MS Word authoring interface supports easy Localization of content. Now users can easily create multilingual versions of the same course. RapideL Enhance^{3.1} supports Spanish, Portugal, French, Italian, and a host of other European and Asian Languages The course players too are available in a range of languages.

RapideL Enhance^{3.1}

RapideL Enhance^{3.1} is a new age rapid eLearning content creation and publishing tool designed by Brainvisa. RapideL Enhance^{3.1} has successfully managed to shorten the traditional development cycle by integrating storyboard and development phase into one.

RapideL Enhance^{3.1} provides Instructional Designers (ID), Subject Matter Experts (SME), and Visual Designers (VD) with an authoring system which allows them to convert their MS Word storyboard into instructionally sound flash courses at the click of the button! RapideL Enhance^{3.1} has successfully addressed common pain points by reducing time-to-market of courses by over 45%, reducing review cycles by the SME by 30% and development cost by a substantial 40-60%!

RapideL Enhance^{3.1} is the solution when you need to:

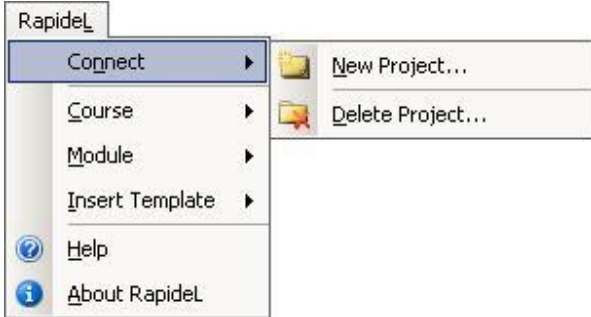

- Transfer critical information to learners
- Inform learners about the changes that are made in a concept
- Create courses that have a short shelf life
- Create training where learners needs to be updated regularly and frequently
- Create an introductory text for an Instructor led Training (ILT) or a blended learning program
- Tackle problems or tasks that need to be handled urgently
- Create rich, interactive applications for

- Sales Training
- Compliance
- Company Policy
- Marketing
- Product Introduction

Main Components

RapideL Enhance Menu

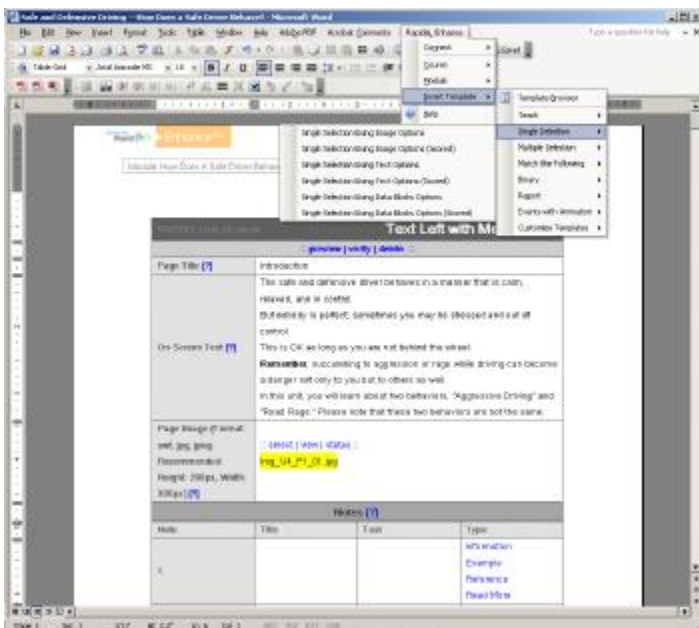

The RapideL Enhance^{3.1} Menu is the interface using which an author or a reviewer can perform various tasks.

- Create/Manage courses
- Create/Manage course modules
- Open module storyboards
- Generate course reports
- Review courses
- Generate SCORM packages
- Manage Course Players' look and feel
- View the generated course in the Course Player

The following are the tasks, which may be performed by a reviewer:

- Browse through courses
- Open courses in review mode
- Add review notes at page level

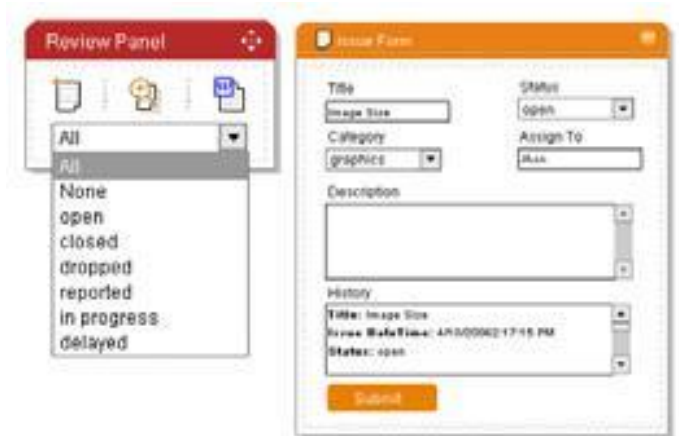

Storyboard Interface

The RapideL Enhance^{3.1} Menu opens the module storyboard in Microsoft Word. The Course author can do any of the following tasks:

- Select a Template for the storyboard
- Populate content into automatically generated table
- Select audio/image assets to insert in the storyboard
- Preview course output
- Delete inserted pages

Review Panel

The RapideL Enhance^{3.1} courses can be opened in the review mode where the current modules of the selected course are displayed. The author or reviewer may go through module pages and view the final output in the display region.

The following tasks may be performed on the current selected page:

- Add new issues you have encountered while reviewing the course. This adds a sticky which can be dragged around and placed anywhere on the current page thus acting as a visual indicator. When the author enters the review mode, he / she may view the notes added by the reviewer and make the required changes.
- Jump to storyboard to take you back to the exact page where the issue has been reported.

▶▶ Template Browser

The Template Browser facilitates browsing through the template repository. The Template Browser can be launched using the Word interface using the RapidL Enhance^{3.1} Menu.

The Template Browser displays the templates according to the template categories. On selecting a template category, all the templates listed under it are displayed. Selecting a template displays a snapshot of the template along with the template description.

Selecting the Insert option on a template inserts the corresponding template in the open storyboard.

▶▶ Course Player

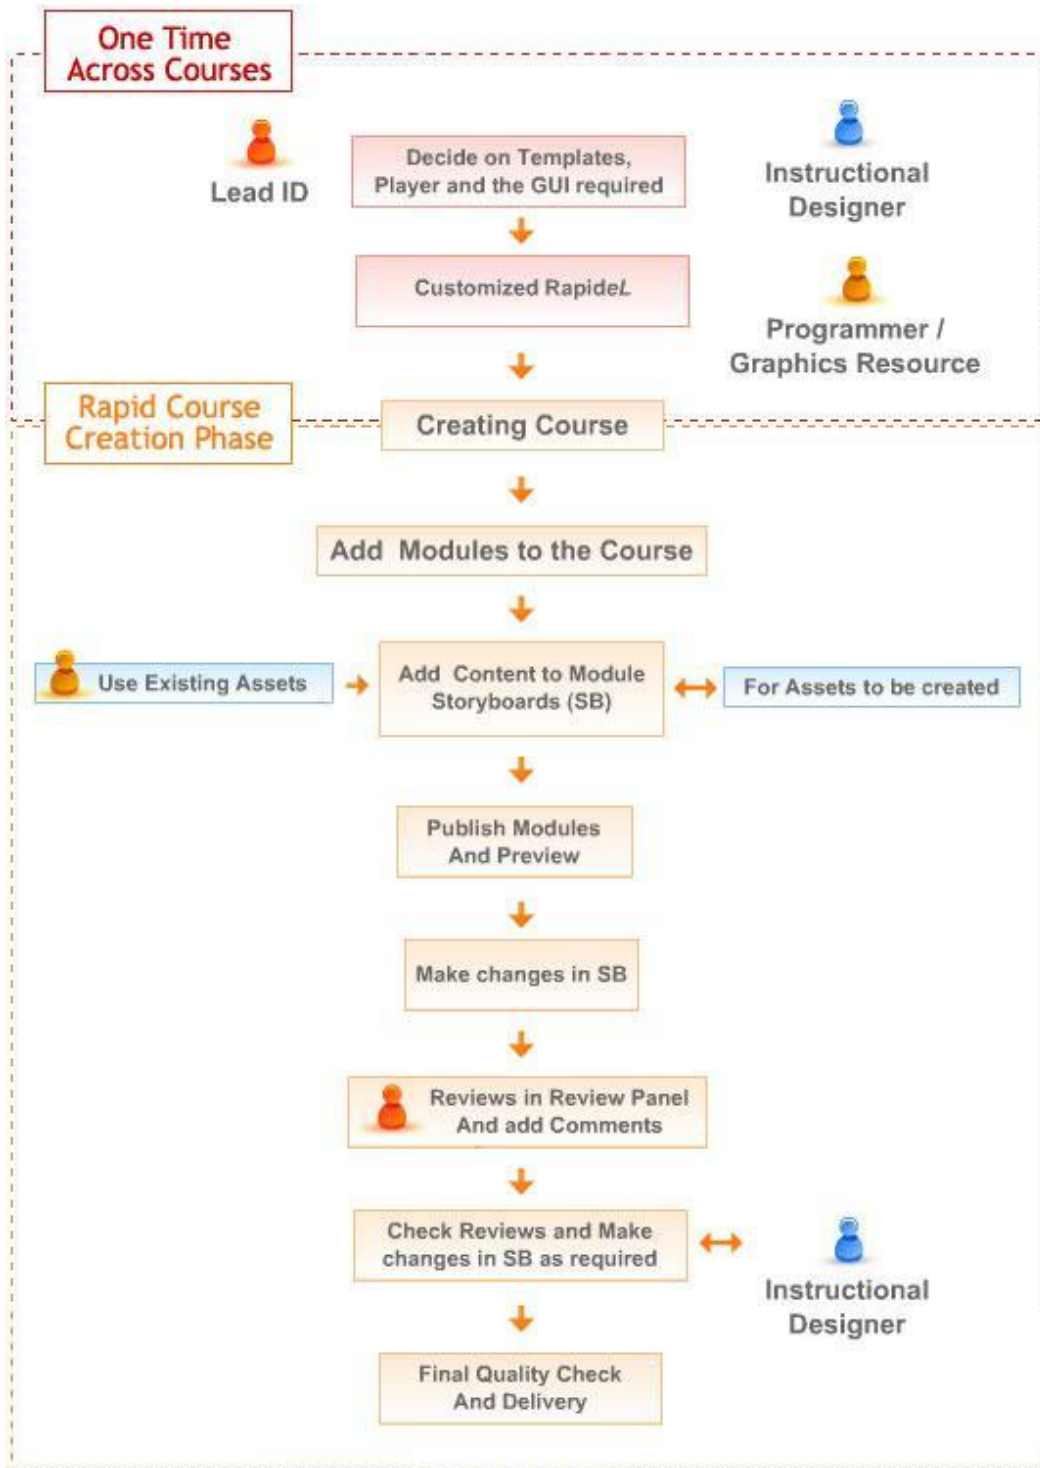

The Course Player can be customized as per the course requirement using the customization feature of RapidL Enhance^{3.1}. The Course Player provides options for

- Adding logo
- Adding a splash introduction screen
- Changing and customizing the player title
- Adding various player properties
