

i am simple

i am expansive

i am quick

i am reliable

i am online

Now you and "i" can create engaging eLearning at the speed of business...

Introduction

RapideL-i is an internet-based, rapid eLearning content authoring solution. Multiple users can log on and work simultaneously to create engaging eLearning at anytime, from anywhere.

You can now focus only on content while RapideL-i takes care of the speed of development, content integration, deployment options of the course and ROI on every dollar spent!

RapideL-i is powered with ready-to-use templates having sound instructional design patterns.

No more clogging your personal computers with gigabytes of courseware as you author your courses online with secure logins.

1 Do I need to install anything on my local system?

👉 "No. RapideL-i is a pure web based application and can be accessed through Internet Explorer 6.0 or above."

2 How many authors/user accounts I create on RapideL-i?

👉 "As many as you may want to! The accounts would be active for a year and you may renew or discontinue the subscription after a year."

3 I have a large team of course reviewers who may not be authors. Do I have to buy subscriptions for them as well?

👉 "No. Using the Review mechanism of RapideL-i you can send the courses for review to any number of reviewers, anywhere in the world. The course review can be done using a web link. You can intimate the reviewers through an email which would contain the auto-generated link for the reviewers"

4 What all media elements are supported by the templates of RapideL-i?

👉 The Flash templates of RapideL-i support Swf, Mp3 and Jpg media formats. While the HTML templates can support most of the additional media formats. Avi, gif, wav etc .

5 How do I publish the course and what are my course deployment options?

👉 Using the publish function of RapideL-i you can publish a course for multiple deployment options like CDROM based, web-based or LMS based deployment. RapideL-i supports SCORM 1.2 and SCORM 2004 standards. In addition, if you need your courses to be hosted and managed in a cost-effective manner, Brainvisa can provide you that service. Please write to us at sales.rapidel@brainvisa.com for the same.

6 What screen resolutions does RapideL-i support?

👉 We recommend 1024*768 resolutions for using the application. The course output is also set at 1024*768

7 Do I have to renew my template subscription annually, along with the application?

👉 No. Template subscription is a one time cost and all your users can use these templates perpetually, as long as you have the subscription of RapideL-i active.

8 How is my course content and data kept secure?

👉 RapideL-i is a fully secure and stable web-application developed as per prevailing industry standards. Write to us at sales.rapidel@brainvisa.com for a technical fact sheet.
